

How to Complete an FPET Run Using Default Data

Follow the steps to run FPET with default data

- 1. Go to FPET.Track20.org**
- 2. Register for an account, log in**
- 3. Go to Start Run tab**
 - a. Select survey database
 - i. Make sure "Default" is clicked. Choose Track20 2019 or UNPD 2019.
 - b. Select population database
 - i. Make sure "Default" is clicked. Choose UNPD 2019.
 - c. Select service statistics
 - i. Do not choose a database
 - d. Select country/population
 - i. Choose your country
 - e. Input run name- create a name for your run file that you will recognize.
 - f. Change years of projections if selected range is not what you want.
 - g. Click Review Data- make sure all the data you want is in the survey data tab, if it is not, go to the "FPET Runs with Custom Data" handout and follow those instructions to add new data/delete data/edit data.
 - h. Click start run
- 4. Run History tab will load**
 - a. When hourglass turns green, run has succeeded; if run turns red, run failed. The run will take 5-15 minutes. Change to green is the only way you will see that it is complete.
- 5. Go to View Run tab**
 - a. Select existing run
 - i. Choose the name of the run you just completed (it will be at the bottom of the dropdown list)
 - b. Select country/population to view
 - i. Country should pre-populate itself after you selected your run
 - c. Click view run
 - i. Input data are available on tabs "Survey data," "Population data," and "Service statistics"
 - ii. Output data are available on "Results" and "Charts" tab
 1. You can view results online or download to view offline and store for your records
